

# Women's Appeal for Peace

March 8th, 2022

*The Women's Appeal for Peace was initiated by feminists and peace activists from Croatia on February 24, 2022, the first day of Russia's invasion of Ukraine. So far our Appeal has been supported by nearly 500 feminists and peace activists from post-Yugoslav countries and the world. The Appeal was immediately sent to the highest state institutions in Croatia and the world (from the President of the Republic of Croatia, the Prime Minister to the UN, the Council of Europe and the European Union), the Embassies of Ukraine and the Russian Federation in the Republic of Croatia and Belarus, and as well to international feminist and peace networks and organizations (War Resisters' International, Bund für Soziale Verteidigung, European Women's Lobby, V-Day, Josei no kōdō nettowāku, International Fellowship of Reconciliation, Quaker Peace and Service and etc.). Thousands of activists from around the world - from Japan to South America and women of different vocations - have published this Appeal on their portals and continue to share it. In the meantime, unfortunately, we are witnessing a further escalation of the war and a senseless destruction in Ukraine, and above all a human catastrophe of inconceivable proportions. But we are also encouraged by more and more anti-war voices from all over the world, as well as more vigorous forms of resistance to war. We wholeheartedly support the peace actions worldwide, especially in Russia, Belarus and Ukraine, beyond the growing Russophobia in the West. This is our joint cry, because the war must be stopped unconditionally and immediately.*

With consternation and disbelief, we are witnessing the escalation of the war and violence in Ukraine caused by the Russian invasion and the suspension of negotiations between the leaders of Russia and Ukraine.

As female citizens of Europe and the world, we demand from the Government of the Russian Federation to immediately cease hostilities, knowing that war is a crime against peace and humanity. At the same time, we urge all sides in conflict to continue the negotiations through diplomatic channels and to rely on all available non-violent means, in order to find appropriate solutions and ensure long-term peace and security in Ukraine, including the Donetsk and Luhansk regions.

As peace activists and feminists, we strongly oppose any act of war by any state or international actor. We oppose the culture of violence based on permanent military armament, constructing and producing of enemies, macho-militaristic competition and creation of new military shields in the heart of Europe.

We also oppose the public incitement to war by powerful states based on their geopolitical and financial interests, and warmongering atmosphere that promotes fear and anxiety among the people of Ukraine, but also among the citizens of neighbouring countries as well as citizens of Russia.

As witnesses of the havoc of war and war iconography during the 1990s in our own country, we are well aware of the harmful repercussions of the war and its long-lasting devastating effects on society, civilians and the human community. We know all too well how divided communities in the post-war period suffer from trauma, and feelings of injustice, which makes the healing hard to achieve. For us, human security and the life of every human being is an ethical imperative for every political action, surpassing issues such as state-territorial interests, political independence and military-defence security.

Therefore, we demand from the Government of the Republic of Croatia to actively support peace efforts in order to prevent further escalation of the conflict.

We express our solidarity with all citizens of Ukraine and express our support for peace initiatives and anti-war movements in Ukraine, Russia and Belarus.
